

Portable Solutions for Modern Pen-Testing

Bootable USB with Pre-Configured Audit Tools

Summary

- Create a bootable USB containing all essential pen-testing tools
- with customized field audits.
- • Portable and easy to carry
- • Runs directly from USB
- • No need to install tools manually

Procedure

- Build/Customize a Linux Distro like Kali, Parrot, or Ubuntu with pre-configured tools:
- • Wireshark
- • Metasploit
- • OpenVAS
- • Burp Suite CE
- • Script startup actions

Result

- ✓ A bootable ISO/USB with a live OS.
- ✓ Autoloads toolsets automatically.
- ✓ Runs pre-configured audit scripts.
- ✓ Generates audit logs after scans.
- ✓ Portable solution for modern Pen-Testers.
